Information on why and how to get and use this keyboard layout:

http://www.techlanguage.com/tips/us_international.html

The Windows 10 instructions seem out-of-date. Here is what Señora Ervin did to activate this keyboard: Click **Start** > scroll to and click **Settings** > click **Region & Language**

> under +Add a language click **English (United States)** > click **Options**

> click **Add a keyboard** > scroll to and click **United States-International QWERTY**

> return to Settings, exit and start typing!
